Comments: My Verizon cell phone service is absolutely terrible this year. Invariably when I use it so many people tell me they can't hear me clearly. I then have to disconnect and use my land line. Cell reception has never been great, but this year it has worsened immeasurably. It's a new Apple phone, so I know the problem is the service. I never get more than one bar. Sure hope the cell tower will fix this problem. Thank you. (By the way, ask Verizon if service has weakened due to increased users.)
